MUHAMMAD WASEEM

Java Software Engineer | Android Developer | Co-Founder & CEO, Ziyaan Technologies

Quetta, Pakistan | (317) 253-2083 | muhammadwaseem92123@gmail.com | linkedin.com/in/muhammad-waseem-a5191038a

SUMMARY

Software Engineering graduate and Co-Founder & CEO at Ziyaan Technologies, a software company building mobile, desktop, and web solutions for businesses and government institutions. Experienced in taking products from requirements through design, development, and deployment, with Android apps published on Google Play and multiple government and business systems delivered to live clients. Skilled in Kotlin, Java, JavaFX, React Native, React/Node.js, REST API integration, and clean architecture. Focused on solving real workflow problems with practical, user-friendly software.

EXPERIENCE

Co-Founder & CEO | *Ziyaan Technologies* **Present**

- Co-founded and lead a software company delivering mobile, desktop, and web applications for business and government clients.
- Personally build and ship Java/JavaFX desktop systems and Android applications, in addition to leading the team and client relationships.
- Own the full project lifecycle — requirements gathering, architecture, development, testing, deployment, and client communication.
- Integrate REST APIs and backend systems (Node.js, PHP, MySQL/PostgreSQL) across mobile, desktop, and web products.
- Improve UI/UX and optimize application performance across the product portfolio.

AI Engineering Intern | *SDSS* **October 2025 – April 2026**

- Work on machine learning concepts, model experimentation, and data preprocessing.
- Assist in evaluating ML models and research-based implementations.
- Collaborate with senior engineers on AI-driven features.

PROJECTS

HumKaam — Android App & Web Platform — *Kotlin, Jetpack Compose, React, Node.js, PostgreSQL · Published on Google Play (Android)*

- Pakistan's #1 verified professionals network — connects clients with ID-verified, background-checked plumbers, electricians, tutors, and nurses.
- Built a companion web platform with search, booking, in-app messaging, reviews, and admin management dashboards.
- Integrated REST APIs and real-time data handling across the Android and web clients.

Chaman Bazar — Government Mobile App — *React Native, Node.js, MySQL · Published on Google Play · Client: Government of Balochistan*

- Government digital initiative to regulate and monitor the prices of essential commodities across the Chaman region.
- Built a complaint submission portal for overpricing violations to support consumer protection and market transparency.
- Built a cross-platform React Native front end with a Node.js/MySQL backend, handling real-time data flow for public use at scale.

Java/JavaFX Business Management Systems — *Java, JavaFX, MySQL · Ziyaan Technologies client work*

- **GKB Banquet Booking System (Quetta)** — reservation, hall management, and analytics platform for Grand Kebabish Banquet.
- **Pakwan Management System (Quetta)** — restaurant order handling, menu management, billing, and reporting.
- **Cafe Baldia (Quetta)** — café POS and management system covering dine-in/delivery orders, table management, billing, ledger (khata), and daily sales reports.

Web Application Business Management Systems — *TypeScript, NestJS, Vue 3, Vuetify, MySQL · Ziyaan Technologies client work*

- **NK Super Mart Retail Management System (Chaman)** — retail POS and inventory platform for a supermarket and its warehouse, covering billing, purchasing, stock transfers, and reports.
- **Quetta Main Board (Quetta)** — retail POS, stock management, sales, and inventory platform.
- **Gaffor & Sons (Quetta)** — retail POS, stock management, sales, and inventory platform.

SKILLS

Mobile, Desktop & Web Development: Android (Kotlin, Jetpack Compose, Java), React Native, Java/JavaFX Desktop Apps, React & Node.js, REST API Integration, UI/UX Implementation

Languages & Databases: Kotlin, Java, JavaScript, PHP (Basic), MySQL, PostgreSQL

Tools & Concepts: Android Studio, Clean Architecture, Version Control (Git), Debugging & Performance Optimization

Core Concepts: Cross-platform development, API integration, Mobile UI/UX design, Clean code practices

EDUCATION

Bachelor of Science in Software Engineering

Graduated — Fall 2022 Session

ADDITIONAL EXPERIENCE

AI Instructor | *NAVTTC*

- Teach fundamentals of Artificial Intelligence and Machine Learning, including core concepts, practical implementations, and student guidance.
- Conduct sessions on real-world applications, assist students with projects, and simplify complex technical topics.
